# TruVue™ Verification Station

## Multi-Purpose Counterfeit Detection Solution Verifies Payments and Identification

**NEW**

**2018 BUSINESS PRODUCT  
OF THE YEAR!**

**VALIDATE**

**AUTHENTICATE**

**SECURE**

**HELPS PREVENT LOSS FROM:**

- Counterfeit Bills
- Fake ID Cards/Driver's Licenses
- Fake Passports
- Cloned Credit Cards

# TruVue™ Verification Station

MMF POS introduces a patent-pending, innovative and highly effective multi-purpose verification station. An integrated space-saving solution with a variety of reliable and quick counterfeit detection features that seamlessly integrate with most existing Point-of-Sale solutions.

- ✓ **Minimize loss** from receiving counterfeit currency at the POS station
- ✓ **Eliminate liability** from accepting fake identification
- ✓ **Improve efficiency** by streamlining the validation process without increasing checkout times
- ✓ **Maximize space efficiency** by eliminating the need for stand-alone devices that require extra counter space

## VALIDATE • AUTHENTICATE • SECURE

### Validate Bills

Authenticate security features on U.S. bills that are invisible to a human eye

### Validate Passports

View holograms that are printed on the biodata page

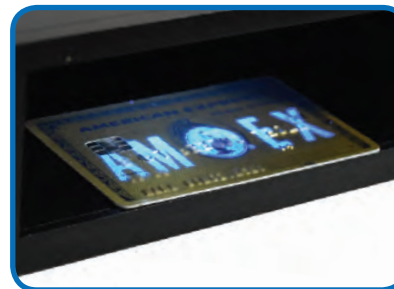

### Authenticate Identification Cards and Driver's Licenses

Read holograms on IDs that are positioned over the most sensitive information

### Authenticate Credit Cards

Show holograms that differentiate legitimate cards from cloned credit cards

### Secure Counterfeit or Large Denomination Bills

LockIt® secured compartment to store confiscated counterfeit bills, fake IDs and large bills

### Prevent Misplacing Credit Cards on Open Tabs

Secure placement for credit cards left behind or held for open tabs

# Innovative Features

## Dual Side Brackets

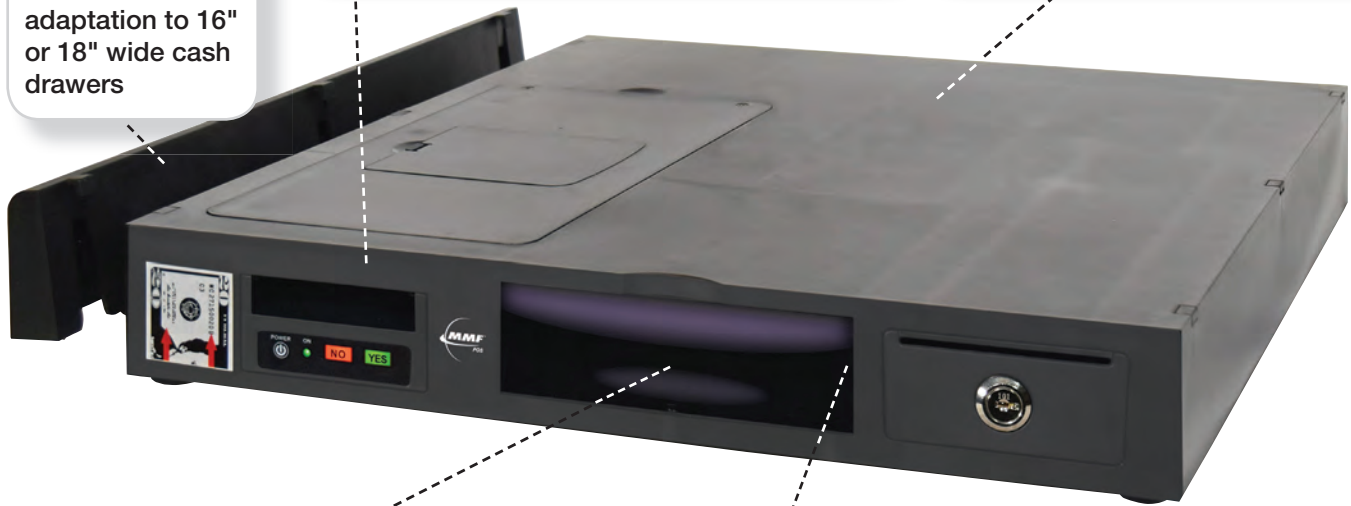

Detachable for adaptation to 16" or 18" wide cash drawers

## Counterfeit Bill Detector

Uses the most accurate technology to quickly and effectively detect fake bills. A front-facing power switch and status panel provides instant and clear verification results

## Reinforced Top Surface

Holds up to 35 lbs. Surface provides ample room to accommodate a full POS system, monitor, printer, scanner, etc.

## Ultraviolet (UV) Detector

A multi-purpose compartment with motion sensor that automatically turns on to validate holograms embedded in valid IDs, driver's licenses, credit cards, passports, and banknotes

## LockIt® Secured Compartment with Deposit Slot

A secured compartment to store confiscated counterfeit bills, fake IDs, credit cards and large bills

Seamless Integration on 16" or 18" Wide Cash Drawers

# TruVue™ Counterfeit Detection uses Leading Edge Technologies

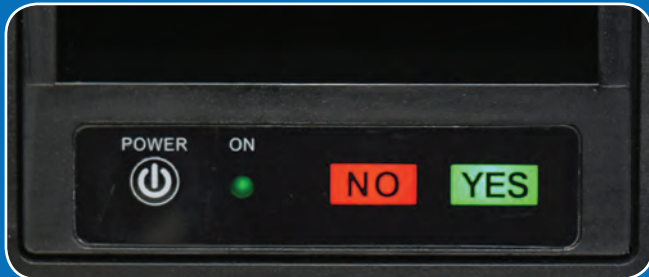

## Magnetic (MG) Detection

verifies the presence of magnetic ink used to print authentic bills. This helps bleaching of bills to reprint larger denominations on legitimate paper

## Infrared (IR) Detection

confirms portions of the banknote printed in infrared ink. IR features on U.S. currency are not legible by a human eye and require a machine to read, making them extremely difficult for counterfeiters to replicate

## Power Switch and Status Panel

Easy access to turn on/off the detector and provides instant and clear verification result

## Easy-Access Top Cover

Simple top cover design provides users room to access the bill feeder for occasional maintenance

## Connectivity and Secure Cable Management

- To future-proof your investment a USB port is provided to allow periodic software updates and maintenance
- 12Vdc power port provides power to the device
- Protected cable routing secures and prevents cable strain on the power supply cord

## Non-Slip Bottom Surface

Rubber feet stabilize the station when placed on top of a cash drawer

# Counterfeiting Hurts Businesses

■ **Counterfeit Pens are NOT Enough**  
Pens only detect legitimate paper. However, criminals wash small denomination bills in bleach and use the paper to print larger denomination bills

■ **Harmful Effect on Profits and Business Operations**  
Businesses that unintentionally accept a fake bill incur a direct loss as a result of handling counterfeit money

■ **High Risk for Reselling Controlling Products to Minors - Fake ID use is on the rise**  
Businesses are subject to liability associated with accepting fake Identification cards

■ **Hackers Create Fake Credit Cards**  
Counterfeit credit cards, also known as cloned credit cards, are the most common form of credit card fraud in the U.S.

## \$70 Million

Counterfeit Notes Circulating in the U.S.

U.S. Department of the Treasury

## \$20 Bill

Most Counterfeit Bank Note in the U.S.

U.S. Federal Reserve

### Violating a Controlled Substance License Can Result In

- Fines
- Warnings
- Suspensions
- Revocations

legalmatch.com

### Altered or Cloned Credit Cards Account for

# 44%

of Card Fraud Types in the U.S.

US Federal Reserve Payments Study 2016

# Maximize Checkout Counter Space
