INCLUDED IN KIT

(Qty.1) VESA Counter / Wall Stand

(Qty.4) M4-0.7x10mm Screws

NOTE: Mounting template available for download at www.mmfpos.com

TOOLS AND HARDWARE REQUIRED

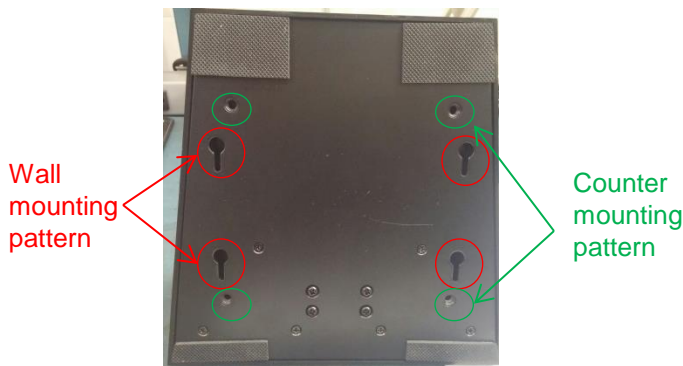

- Hardware for mounting stands onto a flat surface are not included. Hardware will need to suit the specific desktop or platform thickness.
- Phillips Head Screwdriver or power drill will be required to mount stand to surface.

STEP 1

Place stand on top of flat surface as a free-standing solution or anchor it to a counter or wall.

- To Secure onto a counter:** Bolt four (4) screws from underneath the counter to the bottom base plate using mounting template provided .
- To Secure onto a wall:** Use mounting template provided to mark wall anchors (not provided), attach the base stand unit vertically to the wall

NOTE: Screws for surface mounting are not included since they need to suit the specific desktop, wall or platform thickness.

STEP 2

Remove the plastic cover from VESA Mounting plate.

Align arm vertically until plastic cover can be pulled off.

STEP 3

Secure monitor to the stand

Use the custom screws provided by the monitor's manufacturer, located on the back of the device.

Align the back of the monitor to the corresponding 75/100mm VESA Pattern Holes and secure using the custom screws.

STEP 4

Replace plastic cover

Use the four (4) screws provided to secure plastic cover to the back of the VESA mounting Plate.

STEP 5

Ready to use

Position the viewing angle as desired.

Maintenance

Adjust tilting friction if it becomes loose;

1. Remove the 4 screws from the back of the VESA Mounting plate.
2. Remove the plastic cover from VESA Mounting plate. Align arm vertically until plastic cover can be pulled off.
3. Tighten the two (2) side nuts to desired torque .
